Building Services

We have the experience and capability to design and service all of the following types of system control.

Water Supply

Pressure Boosting

Drainage

Cooling Tower

Water Treatment

Chemical Feed Pumps

Metering Pumps

Boiler Feed Pumps

Fountains

Ponds

Pressure Reducing Valves

Trained Technicians

Our service division consists of experienced technicians capable of providing full pump breakdown service, installation, maintenance and repair. Timely service for scheduled pump maintenance. Fast service for emergency resolutions.

Repairs

The simple fact is that when a pump fails, the down time costs more than just money. Cardinal Pump has considerable experience in providing prompt, cost effective solutions for any problematic system.

Service

- Repair of Virtually any Pump Make or Model
- Electric Motor Rewind and Repair
- Metal Spraying
- Weld Repair
- Fabrication
- Machining

On Site Capabilities

- Removal and Reconditioning of Virtually any Pump Make or Model
- Pump Station Refurbishment and Renewal
- Maintenance
- Emergency Repair
- Site Surveys
- Condition Monitoring

Installation

We offer complete installation service. We are able to install a pumping project fully. Our systems are completely turnkey and can be customized to your unique requirements.

Maintenance Contracts

Our maintenance contracts can cover specific pieces of equipment, or give full comprehensive coverage to all of your equipment. This includes preventative maintenance, repairs, labor and components support.

Water Boosting

We offer both fixed and variable speed pump sets, supplied as self-contained packages that are fully wired and plumbed. All package pump sets are fully tested before delivery; minimizing site installation and commissioning problems. Once installed and running, we offer a comprehensive range of after sales services.
